Product Structure

Filling Instruction

- a) A/B/C respectively correspond to the left, middle and right oil tanks filling holes.
- b) Fill 3 different flavors oils from A/B/C.
 - Must keep the silicon plug in and fill oil from the hole, do not take out the silicon plug.
 - Please use the blunt tip needles which are less than or equal to \varnothing 1.8mm.
 - Do not overfill or allow oil enter into the center airway.
- c) Install the mouthpieces as soon as possible after filling.
 - Leave for 5 minutes before use.
 - Remove the silicon covers of the mouthpiece and bottom before use.
- d) Switch Flavors:
 - The bottom three-gear toggle switch corresponds to the output of the three atomizing tanks on the left, middle and right of A/B/C respectively. Whichever side the switch is moved to, the corresponding atomizing tank will work when vaping.
